CHAPTER 3 · SITE PORTFOLIO

Quality · Site administration · Field operations

17 yrs 5 mos · 8 employers, all full-time

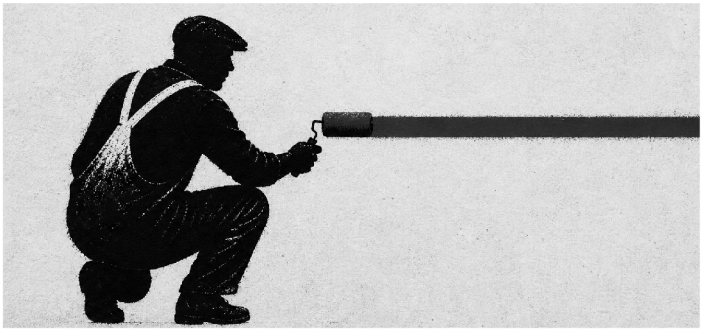

+82 10-4148-0120 · devgru.kang@gmail.com · Asan-si, Korea

ONE PAGE

WHERE THE STANDARD WAS MISSING, I DREW THE LINE.

Photovoltaic site administration, glass quality inspection, vehicle assembly, hospital IT, and two corporate websites. The product and the title changed every time. The work did not — see the problem, set the standard in writing, follow it to the end.

17 yrs 5 mos	8 employers	2 sites	9 licences
Total experience 8 employers, all full-time	Every one permanent no contracts, no dispatch	Corporate websites led planning, vendor, content, design (PM)	Certificates and licences Class 1 Large · forklift under 3 t

"THE LINE" · STENCIL, 2026 · DRAWN FOR THIS PAGE

Drawing the line

Differing inspection calls, work that stopped between the document and the floor, knowledge the next person had to learn again — none of that happened because anyone was careless. It happened because nobody had drawn the line. That is the side of the work I have been on for seventeen years.

— EUNSUNG KANG

01 QUALITY — Judgement, coded and written down

BP Works (Corning Precision Materials) · 2023.04 – 2024.05

PROBLEM The same sheet of glass could pass with one inspector and go back for a second look with another.

DID I split defect types into codes, summarised them in Excel VBA, and wrote the inspection procedure down beside the bench.

LEFT **Defect types standardised · fewer re-inspections · new staff settled in sooner**

02 FIELD · SITE — Paper and parts, held to the end

SH Shinhan ESLD, site administration · 2025.02 – 2026.02

PROBLEM One late permit document holds up the whole site.

DID I tracked permits, authority meetings, material deliveries and contractor schedules in one sheet and read it every morning. Drawings I read in AutoCAD and worked with the site at that level.

LEFT **Permits, materials and schedule visible in one sheet · 11 process documents left behind**

03 WEB · PM — Two doors, built with a vendor

SH Shinhan ESLD · 2025.02 – 2026.02

PROBLEM Parent and subsidiary had no website; two had to be built from nothing.

DID I selected and managed the outsourced developer, ran the contract and schedule, and directed the content — 16 construction case studies, five years of delivery records — and the design, as PM.

LEFT **Parent site Dec 2025 · subsidiary Jan 2026 — sh-shinhan.co.kr / sh-ent.co.kr**

AVAILABILITY

Permanent · shift work, six-day weeks, residential (dormitory) · immediate start

Commutable to Cheonan and Asan · Class 1 Large and forklift (under 3 t) · English: basic to intermediate, everyday conversation

Public version: no home address, date of birth, salary or signature. · 22 Nov 2026
